

Invitation to the 4th conference MITAV MITAV 2017

Union of Czech Mathematicians and Physicists, Brno branch (JČMF) cordially invite you to the conference **MITAV** (Mathematics, Information Technologies, and Applied Sciences), organized in co-operation with the Faculty of Military Technology of the University of Defence in Brno, Faculty of Science, Faculty of Education and Faculty of Economics and Administration of Masaryk University in Brno and Faculty of Electrical Engineering and Communication of Brno University of Technology.

MITAV 2017 will take place in the **Club of the University of Defence in Brno**, Šumavská 4 on **June 15 and 16, 2017**.

Aims and target group of the conference

The conference **MITAV 2017** is the fourth MITAV conference. It should attract in particular teachers of all types of schools and is devoted to the most recent discoveries in mathematics, informatics, and other sciences as well as to the teaching of these branches at all kinds of schools for any age groups, including e-learning and other applications of information technologies in education. The organizers wish to pay attention especially to the education in the areas that are indispensable and highly demanded in contemporary society. The goal of the conference is to create space for the presentation of results achieved in various branches of science and at the same time provide the possibility for meeting and mutual discussions of

teachers from different kinds of schools and orientation. We also welcome presentations by (diploma and doctoral) students and teachers who are just beginning their careers, as their novel views and approaches are often interesting and stimulating for other participants.

We envisage that the conference will be run in the following sections:

1. Newest results in the individual scientific disciplines
2. General aspects of education (primary, secondary, and tertiary schools).

In the case of high number of applications and broader spectrum of contributions, we will consider increasing the number of sections, so that all the participants could present their work.
